Rizve Hasan

Oslo, Norway — thisisrizve@gmail.com — +47 947 29 244 — linkedin.com/in/mrizvehasan — github.com/RizveOve

Software developer based in Oslo with an MSc in Informatics (Programming & System Architecture) from the University of Oslo and hands-on experience designing, integrating and shipping cloud-hosted systems. Runs VevKraft, a consultancy delivering practical AI integration for SMEs, and builds agentic AI and LLM-based automation workflows. Experienced with Azure and AWS, and with embedding standards and compliance requirements (universal design, accessibility) into software architecture through research with Simula Research Laboratory. Motivated to help Aker Solutions turn AI opportunities into secure, scalable and maintainable solutions for the energy sector.

Professional Experience

Founder & Digital Consultant *Present*
VevKraft, Oslo, Norway *vev-kraft.no*

- Advise SMEs on practical AI integration and digital solutions, translating business needs into secure, maintainable solution designs for clients across hospitality, retail and technology.
- Deliver web development, cloud migration, AI integration and maintenance end-to-end, from requirements and architecture decisions through implementation and ongoing operation.
- Designed and run an agent-based automation workflow: scheduled AI agents that plan weekly work and commit daily progress across four GitHub repositories, covering orchestration, integration and authentication design.
- Embed accessibility and universal design requirements (Norwegian legal standards) into client solutions as a core architecture principle.

Software Engineering Intern *Dec 2025 – May 2026*
Nordic Digi Solutions, Norway

- Developed and shipped user-facing application features in a production environment within an agile team, focusing on scalability, performance, and iterative delivery.
- Used AI-assisted development tools throughout the workflow to improve development efficiency and code quality.
- Containerized backend services with Docker, improving environment consistency across development and deployment.
- Implemented modular, maintainable components following clean architecture principles.
- Collaborated cross-functionally with product and engineering stakeholders to translate requirements into scalable technical solutions.

Web Programmer *Jan 2022 – Jun 2022*
Money Guard Ltd., Bangladesh

- Built and maintained features for a cloud-integrated financial application, improving user engagement by 20% through data-driven iteration.
- Designed and integrated RESTful APIs supporting scalable business data processing and client-server communication.
- Participated in agile sprints and CI/CD pipelines to maintain code quality and enable continuous delivery.

Junior Programmer *Jun 2020 – Sep 2021*
InfoSystem Solutions Ltd., Bangladesh

- Developed application features using JavaScript, Node.js, and MySQL in a client-facing environment.
- Implemented and consumed RESTful backend APIs, ensuring reliable data flow between frontend and backend.
- Collaborated with senior engineers and stakeholders on requirements translation and system design decisions.

Education

University of Oslo *Aug 2022 – Jul 2025*
MSc, Informatics: Programming & System Architecture *Oslo, Norway*

- Thesis: *Validating Accessibility in Crowdsourced Multimedia Survey Frameworks* – extended the Huldra React platform with four accessibility validation features, with Simula Research Laboratory.
- Relevant coursework: Software Testing, Distributed Systems, IT & Management, Development in Platform Ecosystems.

Bangladesh University *Jun 2016 – Jul 2020*
BSc, Computer Science & Engineering *Dhaka, Bangladesh*

- Relevant coursework: Operating Systems, Computer Architecture, Algorithms & Data Structures, Object-Oriented Programming, Distributed Systems.

Thesis Research

Validating Accessibility in Crowdsourced Multimedia Survey Frameworks *2024 – 2025*

University of Oslo / Simula Research Laboratory *Huldra Project, SimulaMet*

- Extended the Huldra platform with four modular accessibility validation components, applying structured software engineering practices: requirements analysis, iterative development, and empirical testing.
- Conducted user studies with 49 participants and analysed the data to produce empirical findings, translating business requirements into testable software outcomes.
- Technologies: Node.js, React.js, JavaScript (ES6+), TypeScript, CSS3, Firebase, Git, Figma.

Technical Projects

Kraftsyn – AI Drone Inspection Platform (in development) *VevKraft*

Pipeline: drone imagery upload → 3D building model → AI-based defect detection

- Architecting a staged pipeline that separates image ingestion, 3D model generation and defect detection, so each stage can be developed, scaled and replaced independently.
- Baseline (photo upload to 3D model) in progress; computer-vision defect detection planned as the next stage.

OrderF – Real-Time Restaurant Business Management System *Live Demo* | *GitHub*

Full-stack app with real-time order processing, admin dashboard, and multi-location menu management

- Implemented Firebase Firestore for live data synchronisation and CRUD operations across restaurant locations.
- Technologies: Next.js, React, JavaScript (ES6+), Firebase, CSS3.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, C#, Python, Java, SQL
AI & Automation	Agentic AI workflows, agent orchestration, LLM integration, AI-assisted development, prompt engineering
Architecture	Solution design, clean architecture, REST API and integration patterns, requirements analysis, security & IAM fundamentals
Frameworks & APIs	React.js, Next.js, Node.js, ASP.NET, REST APIs, Flask
Cloud & Infrastructure	Azure, Azure DevOps, AWS (EC2, S3, IAM, networking & security), Firebase, Docker, GitHub Actions, Linux
Databases	SQL (MySQL), MongoDB, Firebase Firestore (NoSQL), data modelling
Development Tools	Visual Studio Code, IntelliJ, Git, GitHub, Vite, Webpack
Testing & QA	Jest, Cypress, TDD, unit / integration testing, Postman

Soft Skills

Collaboration	Cross-functional collaboration, client communication, stakeholder management
Work Approach	Problem-solving, initiative, adaptability, time management, business acumen
Languages	English (Fluent), Norwegian (B1 – Intermediate), Bengali (Native)

Certifications

AWS Certified Cloud Practitioner Amazon Web Services

Issued: Jan 2026 · Expires: Jan 2029

AWS re/Start Program Amazon Web Services

In progress · Completed: Cloud Foundations, Linux, Networking, Security
